EXAMINER

TANG, KAREN C

ART UNIT PAPER NUMBER

2151

DATE MAILED: 02/24/2006

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary	Application No. 09/831,274	Applicant(s) JONES ET AL.	
	Examiner Karen C. Tang	Art Unit 2151	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 18 November 2005.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 14-34 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 14-34 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Art Unit: 2151

- This action is responsive to the amendment and remarks file on 11/18/05.
- Claims 14-34 are amended and are ready for further examination,

DETAILED ACTION

Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

The claimed invention is directed to non-statutory subject matter. Claims 20 and 27 indicate the usage of "carrier carrying a URL".

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 14-34 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bonjour et al hereinafter Bonjour ("Internet applications over native ATM") in view of Lee et al hereinafter Lee (RFC 1738 Uniform Resource Locator).

1. Referring to Claims 14, and 21, Bonjour disclosed a method for operating a network circuit using a uniform resource locator URL (web browser utilizing the URL, 1098, par 2),

Art Unit: 2151

Bonjour did not expressly disclose the URL comprising a circuit- switched identifier part identifying a resource as being available via the circuit-switched network, an address part comprising the address of the resource, and a service parameter part, wherein it is the circuit-switched identifier part which identifies the specific type of circuit switched network via which the resource is accessible;

Lee discloses the URL comprising a circuit- switched identifier part identifying a resource as being available via the circuit-switched network (page 9), an address part comprising the address of the resource (refer to page 4, section 2.3 and <address part>, page 9), and a service parameter part, wherein it is the circuit-switched identifier part which identifies the specific type of circuit switched network via which the resource is accessible (<host<a>, refer to page 9).

At the time of the invention, it would have been obvious to a person of ordinary skill in the art to indicate the components in the URL into Bonjour's invention.

The suggestion/motivation would have been that Bonjour discloses utilizing the URL and benefit of internet can adapted by the end user to whom they are already familiar with the internet technology, furthermore, it can take advantages of all the ATM network capabilities.

2. Referring to Claims 15 and 22, Bonjour disclosed the usage of URL (web browser/internet utilizing the URL, 1098, par 2).

Art Unit: 2151

Bonjour did not disclose the uniform resource locator has the format: <circuit-switched identifier part://<service parameter palo*<address palo where * is a predetermined separator character.

Lee disclosed the uniform resource locator has the format: <circuit-switched identifier part, refer to page 9,) ://<service parameter part, (<host<a>, refer to page 9) *<address part> (port, refer to page 9) where * is a predetermined separator character ("/", refer to page 9).

At the time of the invention, it would have been obvious to a person of ordinary skill in the art to indicate the components in the URL into Bonjour's invention.

The suggestion/motivation would have been that Bonjour discloses utilizing the URL and benefit of internet can adapted by the end user to whom they are already familiar with the internet technology, furthermore, it can take advantages of all the ATM network capabilities.

3. Referring to Claims 16 and 23, Bonjour disclosed in which the identifier part identifies the resource as being accessible via an ATM network (refer to page 1099, par 2).

4. Referring to Claims 17 and 24, Bonjour disclosed a method as in claim 16 in which the service parameter part includes ATM service parameters (refer to page 1100, par 3).

Art Unit: 2151

5. Referring to Claims 18 and 25, Bonjour disclosed in which the service parameter part includes an identifier for a connection topology (protocol stack, refer to page 1100, par 3).

6. Referring to Claims 19 and 26, Bonjour disclosed in which the service parameter part includes a parameter indicating a connection bandwidth (connection management, refer to page 1100, par 3).

7. Referring to Claims 20 and 27, Bonjour disclosed a machine-readable carrier carrying a URL according to claim 14 (signal, refer to page 1100, par 3).

8. Referring to Claim 28, Bonjour disclosed a method of operating a terminal connected directly or indirectly to a circuit-switched network, the method comprising: a) reading a uniform resource locator URL (web browsing utilizes URL to extract resources), and (b) subsequently establishing a connection between the customer terminal and the resource, the connection having properties determined at least in part by one or more parameters contained in the service parameter part (by utilizing the web/internet access, the user is able to utilizing URL to access resources and able to get the service parameter part.).

Bonjour did not expressly disclose the URL comprising a circuit-switched identifier part identifying a resource as being available via the circuit-switched network, an address part comprising the address of the resource, and a service parameter part, wherein it is

Art Unit: 2151

the circuit-switched identifier part which identifies the specific type of circuit switched network via which the resource is accessible;

Lee disclosed the URL comprising a circuit- switched identifier part identifying a resource as being available via the circuit-switched network (page 9), an address part comprising the address of the resource (refer to page 4, section 2.3 and <address part>, page 9), and a service parameter part, wherein it is the circuit-switched identifier part which identifies the specific type of circuit switched network via which the resource is accessible (<host<a>, refer to page 9).

At the time of the invention, it would have been obvious to a person of ordinary skill in the art to indicate the components in the URL into Bonjour's invention.

The suggestion/motivation would have been that Bonjour discloses utilizing the URL and benefit of internet can adapted by the end user to whom they are already familiar with the internet technology, furthermore, it can take advantages of all the ATM network capabilities.

9. Referring to Claim 29, Bonjour disclosed reading the uniform resource locator from a server remote from the terminal (refer to page 1099, par 3-5).

10. Referring to Claim 30, Bonjour disclosed in which step (b) is initiated by the terminal (refer to page 1099, par 3-5).

Art Unit: 2151

11. Referring to Claim 31, Bonjour disclosed the identifier part identifies the resource as being accessible via an ATM network, and the service parameter part contains one or more ATM service parameters (page 1100, par 3).

12. Referring to Claim 32, Bonjour disclosed a terminal for use in a communications network including a circuit-switched network, the terminal comprising:

a) a network interface for connection to the communications network (browsing, refer to page 1097, par 3, cont in page 1098);

b) and a processor arranged to carry out the following steps:

i) reading a uniform resource locator URL (web browsing utilizes URL to extract resources), and (ii) subsequently establishing a connection between the customer terminal and the resource, the connection having properties determined at least in part by one or more parameters contained in the service parameter part (by utilizing the web/internet access, the user is able to utilizing URL to access resources and able to get the service parameter part.).

Bonjour did not expressly disclose the URL comprising a circuit-switched identifier part identifying a resource as being available via the circuit-switched network, an address part comprising the address of the resource, and a service parameter part, wherein it is the circuit-switched identifier part which identifies the specific type of circuit switched network via which the resource is accessible;

Lee disclosed the URL comprising a circuit-switched identifier part identifying a resource as being available via the circuit-switched network (page 9), an address part

Art Unit: 2151

comprising the address of the resource (refer to page 4, section 2.3 and <address part>, page 9), and a service parameter part, wherein it is the circuit-switched identifier part which identifies the specific type of circuit switched network via which the resource is accessible (<host<a>, refer to page 9).

At the time of the invention, it would have been obvious to a person of ordinary skill in the art to indicate the components in the URL into Bonjour's invention.

The suggestion/motivation would have been that Bonjour discloses utilizing the URL and benefit of internet can adapted by the end user to whom they are already familiar with the internet technology, furthermore, it can take advantages of all the ATM network capabilities.

13. Referring to Claim 33, Bonjour disclosed a data server for use in a communications network including a circuit-switched network, the data server including a store programmed with a Uniform Resource Locator product according to claim 21 (page 1099, par 2).

14. Referring to Claim 34, Bonjour disclosed a terminal in which the identifier part identifies the resource as being accessible via an ATM network, and the service parameter part contains one or more ATM service parameters (refer to page 1097, par 2, 3, page 1098, par 1).

Response to Arguments

Applicant's arguments with respect to claims 14-34 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Karen C. Tang whose telephone number is (571)272-3116. The examiner can normally be reached on M-F 7 - 3.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Zarni Maung can be reached on (571)272-3939. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
